

Thumb Orthosis from Orficast!

*Instructions: Cut a 14" piece of 2 inch wide Orficast.
Heat in hot water and pat dry briefly on a towel.
Stretch back to length.*

- 1. Place the Orficast over the dorsal thumb and pinch together under the IP joint on the volar surface.*
- 2. Wrap around the dorsum of the hand above the wrist crease and continue onto the volar surface of the hand.*
- 3. Continue to wrap over the dorsal radial aspect of the thumb and stretch the Orficast through the first web space from dorsal to volar. Attach firmly. Place the thumb in a functional position and let harden.*
- 4. Cut apart on the dorsal surface and apply Velcro adhesive hook with the heat gun for strapping*

Advantages:
Quick Thumb Orthosis!
Easy to do!!
Use Orficast!
