Uncompromising stability

If you do not want to compromise on medical equipment, **C Line treatment table** is the right table for your practice. That is why we have designed it with superior stability and performance in mind. Novak M C Line treatment tables have a **safe working load** and a **lifting capacity** of an impressive **180 kg**, which will give you much needed confidence that you can apply ample amounts of pressure and the table will not move or bend. The table needs to be **stable**, but you also need to push it around with ease for cleaning and moving purposes. For this reason we have equipped it with **two wheels**, which will help you move the table comfortably yet not interfere with stability during treatments.

Excellent comfort for practitioners

Novak M C Line treatment tables have an excellent **height adjustment range from 48 to 98 cm**, giving you the freedom to choose the exact height spot you want for each patient and treatment. You can either change the height with a **foot switch** or you can opt for **circular foot switch**, giving you the comfort of changing height from all sides of the table. The headrest is **generously adjustable from -40° to 40°** and the **footrest** of the C3 treatment table can be adjusted **up to 75°**. If you need more than a standard single-pad headrest, a **three-part** one is available as an option. Additionally, you can add a **paper roll holder** to quickly and hygienically change paper cover for the next patient.

Superior comfort for patients

We are putting the practitioner comfort first, but we are not forgetting about your patients. The padding on Novak M C Line treatment tables is **extremely lavish (5 cm thick)**, **seamless**, and comes in **many different colors** from Color Chart 3. The table itself is of **generous dimensions (70 cm wide and 200 cm long)** and is standardly equipped with a **wide oblong breathing hole (10 x 24 cm)** and **plug** for treatments in a prone position. What is more, you can lower it as low as 48 cm to make it **easily accessible** to all of your patients.

Long durability

Novak M is a specialist in producing **superior medical equipment** and our C Line treatment tables are no exception. They are made out of the best European mechanical, electrical and hydraulic parts to ensure maximum longevity. The upholstery and all of the materials used for the table base can be cleaned and maintained according to the highest standards of hygiene and durability.
